

**FOI 1516 239**

**Summary Issue: Livestock Associated MRSA Cases**

**This information relates to Bristol Clinical Commissioning Group**

<b>Question</b>	<b>Response</b>
1. When reporting monthly counts of MRSA cases what procedure do you follow to distinguish between health care associated infections and livestock associated infections?	This is not relevant to the CCG. All reported MRSA cases to the CCG are health care related. Most probably this information will be kept by the local authority
2. Please provide, for the last five years, monthly counts of livestock associated MRSA cases in your CCG. If monthly counts would be too time consuming to provide then please provide yearly totals for the last five years.	This is not relevant to the CCG. Most probably this information will be kept by the local authority
3. For each case of livestock associated MRSA in the last five years I would like to know: the cause of the infection, the source of the infection, the duration of treatment, and the outcome of the case.	This is not relevant to the CCG. Most probably this information will be kept by the local authority

The information provided in this response is accurate as of 29.12.15
